**SUNSET**

**JONATHAN STOCKTON** has a fine reputation as a designer and bespoke furniture maker. He has now launched an exclusive range of garden furniture - The Sunset Furniture Collection - the fruition of a design brief that he set for himself.....

## THE DESIGN

I set out to design furniture for my own terrace that would bring glamour into the garden, comfortable without cushions and built to withstand the elements. I wanted chairs that could be outside all year round, with arms wide enough to stand a drink on, beautifully crafted from the finest materials, something with a touch of magic, furniture to be proud of .....I named it SUNSET.

## CRAFTED FROM THE FINEST MATERIALS

**TEAK** - (tik) noun - a large deciduous tree - *Tectona Grandis* - Indigenous to Burma , India and South East Asia.

**DESCRIPTION** - Burmese teak is golden in colour. Teak from other countries can be a rich brown with darker markings.

**SEASONING** - Dries well but slowly - very stable.

**DURABILITY** - Very durable , colour will silver when exposed to the elements.

**USES** - Extensively used for ship decking and boat building, cabinet-making, external joinery and garden furniture.

## THE ULTIMATE IN GARDEN GLAMOUR

The contemporary yet classic lines of Sunset look stylish in the garden or by the pool. A chic addition to any luxurious setting - the ski chalet, the spa hotel, the yacht.....

## BUILT TO WITHSTAND THE ELEMENTS

The open slatted design of Sunset is totally practical. It ensures that water will run off easily and the wind will pass through with little resistance. Each piece of furniture requires a substantial amount of wood which is carefully and skillfully assembled using secret joints and boat building technology.

Sunset can live and last outside.

## WITH A TOUCH OF MAGIC

Any piece from the collection can be given a unique theatrical twist. An optional 'state of the art' LED lighting system can be hidden within. The light can be set on one colour or allowed to blend in rotation creating beautiful beams of white or coloured light.

You can set the right mood for the right occasion - partying into the night - or relaxing into the Sunset.
